Art Unit: 1745

1. Claims 14-25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in Paper No. 101603.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 11, 12 and 28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. (New Rejection)

There is no antecedent basis for “power conditioner” found in each of claims 11 and 12.

It is unclear whether or not the “internal auxiliary load” set forth in lines 1-2 of claim 28 is the same or different than the “internal auxiliary load” set forth in claim 26. Clarification is required.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 4-10, 13, 26, 29-35, 38 are rejected under 35 U.S.C. 102(e) as being anticipated by Fuglevand-US 6,630,259. (New Rejection)

Reference is made to Figures 1, 2 and 4 of Fuglevand along with column 4, lines 18-39 and column 5, line 15-column 9, line 27. It is noted that claim 26 does not specifically require an

internal load but only that the energy storage device be configured to provide power to the same.

The device 14 or 20 in Fuglevand is configured as such.

6. Claims 1, 3-7, 11 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Corless et al.-US 6,559,621 (Corless) (New Rejection)

See column 5, line 17-56 of Corless along with column 9, lines 13-48 and to the drawing figures and in particular, Figure 6. This figure shows the claimed power conditioner which is a converter.
